

STELLA NOVA MOBILE SOLUTIONS

Mobile by Stella Nova provides local and global retailers with a fast, secure and flexible answer to multi-channel, multi-geography POS operations. With seamless operability between register, mobile, kiosk and dot com, the Stella Nova Mobile Retail Framework gives retailers the flexibility of embedded or cloud hosting all within a WCF 4.0 framework for easy configurability and extensibility. Straightforward integration with other Stella Nova and third party applications ensures ongoing productivity and long service life.

- ITEM LOOKUP SERVICE
- PROMOTIONAL PRICING SERVICE
- TAX SERVICE
- TENDERING SERVICE
- TRANSACTION LOG SERVICE
- ELECTRONIC JOURNAL SERVICE
- **UTILITIES/APPLICATION SERVICES**

MOBILE BY STELLA NOVA IS...

Multi-channel	Secure
Scalable	Extensible
Flexible	Customizable

Getting the Most Out of Your Mobile Deployment

A module of the Stella Nova enterprise Mobile Retail Framework (MRF), the Utilities/Applications Services provide retailers with powerful Loss Prevention functionality and enable retailers to reduce costs through increased deployment efficiencies and sharing peripherals. The key components of the Utilities/Applications Services include:

- **Remote/Auto Deployment**
- **Remote Monitoring**
- **Device Sharing**
- **Digital Receipt Validation**

Reduce Costs, Reduce Loss

Deployed on WCF 4.0 Framework, the StellaNova Mobile Retail Framework is designed to provide a secure and extensible platform for retailers in the U.S, Canada and Europe. As part of this framework, the Utilities/Application Services provide multiple benefits, including:

- **Reduce deployment time and costs** by updating devices with new applications seamlessly through remote deployments;
- **Remain on the latest version** of the application with configurable automatic update;
- **True plug and play power for peripherals** with automatic device detection allowing the sharing of peripherals across your registers and mobile devices;
- **Increase profits while reducing shrink** by monitoring the activities on mobile devices within the four walls of the store through a web portal;
- **Reduce operating costs and improve the customer experience** by systematically verifying customer purchases through digital receipt validation.
